

EXTERNAL DOCUMENT COMPLIANCE MANAGEMENT FOR SAP S/4HANA

★ **FEATURED ON SAP.COM** — recognized by SAP as a partner solution extending the eDocument Cockpit for SAP Document and Reporting Compliance on SAP S/4HANA.

[Check out our solution on SAP Store →](#)

Powered by SAP Document and Reporting Compliance (DRC)

The Challenge

As e-invoicing and statutory reporting mandates expand across countries, organizations running SAP Document and Reporting Compliance generate a growing volume of eDocuments across FI, SD and other source applications. The standard eDocument Cockpit gives a country-by-country view, but offers limited cross-landscape visibility, no proactive alerting, and largely manual exception handling.

Without an extended monitoring and control layer, finance and IT teams risk delayed submissions, missed rejections and gaps in audit trail — increasing compliance risk as document volumes and country coverage grow.

The Crimson Solution

Crimson's External Document Compliance Manager extends the standard SAP eDocument Cockpit for SAP Document and Reporting Compliance on SAP S/4HANA, giving finance and compliance teams a single, enhanced control tower for every electronic document, across every country and legal scenario — while remaining fully aligned with SAP's standard architecture.

- Native extension of the standard eDocument Cockpit (EDOC_COCKPIT) and Manage Electronic Documents app
- no separate system, no custom development required
- Consolidated, cross-country dashboard covering every DRC-enabled document type — eInvoices, statutory reports, eWaybills and more
- Proactive status monitoring and exception alerting, so errors and rejections are caught and resolved before they become compliance issues
- Enhanced search, filtering and mass-processing capabilities, built directly on top of SAP standard architecture
- Fast time to value — deployed as a native extension, live in weeks, not months

How It Works

1

Monitor & Detect

eDocuments created in SAP DRC across FI, SD and other source applications are surfaced in a single, unified cross-country cockpit view.

2

Diagnose & Resolve

Errors, rejections and missing data are flagged automatically, with direct drill-down to the underlying source document for fast diagnosis.

3

Track & Report

Every status change, resubmission and communication is tracked centrally, giving finance and compliance teams full audit traceability.

What It Covers

Every Legal Scenario

Works across every country and legal scenario configured in SAP Document and Reporting Compliance, from eInvoicing to statutory reporting.

eDocument Cockpit & Manage Electronic Documents

Extends both the eDocument Cockpit and Manage Electronic Documents apps with additional monitoring, control and mass-action capability.

Full Audit Traceability

Every status change, resubmission and communication is logged and retained centrally for audit and compliance review.

Key Benefits

Reduced Manual Effort

Automated monitoring and alerting reduce the manual checking finance and IT teams do today across countries and document types.

Centralized Visibility

One cockpit view of every electronic document's status across the entire SAP landscape, replacing fragmented, country-by-country monitoring.

Faster Issue Resolution

Direct drill-down from cockpit to source document accelerates root-cause analysis and resubmission.

Minimal Disruption

Built as a native extension of SAP standard apps, with no custom transaction codes or parallel systems to maintain.

Why Crimson

Crimson Technology Consulting combines deep SAP expertise with regulatory insight, helping organizations turn compliance into a controlled, efficient, and strategic capability — today and for the years ahead.

- SAP DRC implementations delivered across 60+ countries and multiple industries
- Proven track record extending SAP standard eDocument apps for enterprise clients across every market we serve
- A single, consistent user experience across every market we deploy in
- Direct engagement with SAP and national tax authorities to keep the solution current as every mandate evolves

A SINGLE CONTROL TOWER FOR SAP DOCUMENT COMPLIANCE
