Powered by SAP Document and Reporting Compliance (DRC)

The Challenge

Jordan has moved to a mandatory, real-time electronic invoicing regime built around JoFotara, the National Electronic Invoicing System run by the Income and Sales Tax Department (ISTD) with the Ministry of Digital Economy and Entrepreneurship. Under the Amended Billing and Control Regulation No. 2 of 2025, Phase 2 went live on 1 April 2025: every invoice for goods or services — B2B, B2C and B2G — must be issued through JoFotara or a system integrated with it to be valid for tax deduction.

Registration and integration were required of all VAT-registered businesses following ISTD's 2024 compliance push, and each invoice must now be generated in structured XML/JSON aligned to UBL 2.1, submitted for real-time validation, and returned with a QR code before it reaches the customer. Organizations running SAP need a standard, scalable path to compliance — without re-architecting their landscape or taking on custom-code risk.

The Crimson Solution

Crimson's Electronic Invoicing Compliance solution for Jordan extends SAP Document and Reporting Compliance to address JoFotara requirements end to end, while remaining fully aligned with SAP's standard architecture.

- Native integration with SAP ERP (ECC) and SAP S/4HANA — no custom development required
- Real-time, ISTD-validated invoice submission through the JoFotara clearance model
- Structured XML/JSON generation aligned to UBL 2.1 and JoFotara's technical and API specifications
- Automatic QR-code retrieval and embedding for buyer-side verification
- Supports both SAP-native billing documents and external-system documents, converted into e-documents within SAP DRC
- Secure, auditable data exchange built entirely on SAP-standard configuration

How It Works

1**Create & Convert**

Billing documents from SAP Finance and Sales are consolidated and converted into e-documents under a single compliance framework.

2**Validate in Real Time**

The e-invoice is submitted to the JoFotara platform, which validates the document and returns a QR code and clearance decision, including rejection reasons if any.

3**Deliver & Retain**

The compliant, QR-coded invoice is delivered to the customer; the record is securely archived to support ISTD audit and tax-deduction requirements.

Key Benefits

Reduced Compliance Risk Delivered entirely through SAP-standard configuration, minimizing custom-code exposure and audit risk.	Centralized Visibility One consolidated framework to monitor e-invoicing and reporting status across the business.
Future-Proof by Design Aligned with SAP's upgrade roadmap and ready to extend as JoFotara's onboarding of SMEs and remaining sectors continues beyond 2025.	Minimal Disruption Fast, standard-configuration deployment that avoids re-architecture of the existing SAP landscape.

Why Crimson

Crimson Technology Consulting combines deep SAP expertise with regulatory insight, helping organizations turn compliance into a controlled, efficient, and strategic capability — today and for the years ahead.

- SAP DRC implementations delivered across 60+ countries and multiple industries
- Proven regional and multi-jurisdiction depth — Jordan, the Baltics, Balkans, CIS, Mauritius, Central America and Africa
- A single, consistent user experience across every market we deploy in
- Direct engagement with ISTD technical specifications to keep the solution current as JoFotara's rollout continues

A GLOBAL STANDARD FOR E-INVOICING COMPLIANCE
